|------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <div>Overall Readiness Score</div> <div>58%</div> <div>Gaps Identified</div> | <div>Controls Passing6 / 20</div> <div>Critical Failures1</div> <div>Partial / Unknown7 / 5</div> | <div>Data Sources</div> <div>Endpoints scanned: 59</div> <div>Users scanned: 184</div> <div>Backup endpoints: 3</div> <div>M365 connected: Yes</div> <div>Open threats: 21</div> |
|------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## Framework Coverage

| Framework       | Score | Pass | Partial | Fail | Unknown | Controls |
|-----------------|-------|------|---------|------|---------|----------|
| Common Controls | 58%   | 6    | 7       | 2    | 5       | 20       |
| Coalition       | 58%   | 6    | 7       | 2    | 5       | 20       |
| Corvus          | 57%   | 5    | 7       | 2    | 4       | 18       |
| Chubb Cyber     | 60%   | 5    | 5       | 1    | 4       | 15       |

## Critical Gaps — Immediate Action Required

| ID    | Category         | Control                                              | Evidence                                   |
|-------|------------------|------------------------------------------------------|--------------------------------------------|
| CI-20 | Network Security | Are open security threats actively being remediated? | 6 critical + 21 total open threats in M365 |

# Detailed Control Assessment

## Multi-Factor Authentication

| ID    | Question                                                          | Status | Evidence                            | Frameworks                                      |
|-------|-------------------------------------------------------------------|--------|-------------------------------------|-------------------------------------------------|
| CI-01 | Is MFA enforced for all users accessing email and cloud services? | PASS   | MFA enforced for all 23 users       | Common Controls, Coalition, Corvus, Chubb Cyber |
| CI-02 | Is MFA enforced for privileged/admin accounts?                    | PASS   | No standing admin accounts detected | Common Controls, Coalition, Corvus, Chubb Cyber |

## Endpoint Protection

| ID    | Question                                               | Status      | Evidence                   | Frameworks                                      |
|-------|--------------------------------------------------------|-------------|----------------------------|-------------------------------------------------|
| CI-03 | Is antivirus/EDR deployed and active on all endpoints? | UNKNO<br>WN | No endpoint data available | Common Controls, Coalition, Corvus, Chubb Cyber |
| CI-04 | Is disk encryption enabled on all endpoints?           | UNKNO<br>WN | No endpoint data available | Common Controls, Coalition, Corvus, Chubb Cyber |
| CI-05 | Are host-based firewalls enabled on all endpoints?     | UNKNO<br>WN | No endpoint data available | Common Controls, Coalition, Corvus              |

## Patch Management

| ID    | Question                                                 | Status | Evidence                                                      | Frameworks                                      |
|-------|----------------------------------------------------------|--------|---------------------------------------------------------------|-------------------------------------------------|
| CI-06 | Are critical patches applied within 30 days of release?  | PASS   | 18 non-critical patches pending — no critical patches overdue | Common Controls, Coalition, Corvus, Chubb Cyber |
| CI-07 | Is there a documented patch management process in place? | PASS   | OPSIS Updates Plus is actively managing patches               | Common Controls, Coalition, Chubb Cyber         |

## Backup & Recovery

| ID    | Question                                                           | Status  | Evidence                                                                                           | Frameworks                                      |
|-------|--------------------------------------------------------------------|---------|----------------------------------------------------------------------------------------------------|-------------------------------------------------|
| CI-08 | Are backups performed regularly and tested for restoration?        | PARTIAL | 2/3 endpoints have backup software detected                                                        | Common Controls, Coalition, Corvus, Chubb Cyber |
| CI-09 | Are backups stored offline or in an immutable/air-gapped location? | PARTIAL | Backup detected (none, Block Level Backup Engine Service) — offsite/immutability status unverified | Common Controls, Coalition, Corvus, Chubb Cyber |
| CI-10 | Is the backup RPO target being met (no more than 24 hours)?        | PASS    | RPO target met on all 3 monitored endpoints                                                        | Common Controls, Coalition, Corvus              |

## Access Controls

| ID | Question | Status | Evidence | Frameworks |
|----|----------|--------|----------|------------|
|----|----------|--------|----------|------------|

|       |                                                              |         |                                            |                                                 |
|-------|--------------------------------------------------------------|---------|--------------------------------------------|-------------------------------------------------|
| CI-11 | Are privileged accounts limited and monitored?               | PASS    | No standing Global Admin accounts detected | Common Controls, Coalition, Corvus, Chubb Cyber |
| CI-12 | Are inactive user accounts disabled within 90 days?          | PARTIAL | 1 accounts inactive 90+ days (4% of users) | Common Controls, Coalition, Corvus              |
| CI-13 | Is a password policy enforced (complexity, length, lockout)? | UNKNOWN | No endpoint data available                 | Common Controls, Coalition, Corvus, Chubb Cyber |

## Email Security

| ID    | Question                                                  | Status  | Evidence                                                                     | Frameworks                                      |
|-------|-----------------------------------------------------------|---------|------------------------------------------------------------------------------|-------------------------------------------------|
| CI-14 | Are email security controls in place (SPF, DKIM, DMARC)?  | PARTIAL | M365 connected — email security configuration not directly verified by OPSIS | Common Controls, Coalition, Corvus, Chubb Cyber |
| CI-15 | Are external email forwarding rules blocked or monitored? | PARTIAL | M365 connected — forwarding rules not directly scanned                       | Common Controls, Coalition, Corvus              |

## Security Monitoring

| ID    | Question                                           | Status  | Evidence                                                                | Frameworks                                      |
|-------|----------------------------------------------------|---------|-------------------------------------------------------------------------|-------------------------------------------------|
| CI-16 | Is security event logging and monitoring in place? | PARTIAL | M365 audit logging active — endpoint audit logging status not confirmed | Common Controls, Coalition, Corvus, Chubb Cyber |
| CI-17 | Is Microsoft Secure Score above 50%?               | FAIL    | Microsoft Secure Score: 36% (target: 50%+)                              | Common Controls, Coalition, Corvus              |

## Incident Response

| ID    | Question                                      | Status  | Evidence                                                                                 | Frameworks                                      |
|-------|-----------------------------------------------|---------|------------------------------------------------------------------------------------------|-------------------------------------------------|
| CI-18 | Is there a documented incident response plan? | PARTIAL | OPIS autonomous remediation platform deployed — formal IR plan documentation recommended | Common Controls, Coalition, Corvus, Chubb Cyber |

## Network Security

| ID    | Question                                             | Status  | Evidence                                   | Frameworks                                      |
|-------|------------------------------------------------------|---------|--------------------------------------------|-------------------------------------------------|
| CI-19 | Is TLS 1.2+ enforced (TLS 1.0/1.1 disabled)?         | UNKNOWN | No endpoint data available                 | Common Controls, Coalition, Chubb Cyber         |
| CI-20 | Are open security threats actively being remediated? | FAIL    | 6 critical + 21 total open threats in M365 | Common Controls, Coalition, Corvus, Chubb Cyber |

# Attestation & Delivery

This Cyber Insurance Readiness Report was generated automatically by the OPSIS platform on March 23, 2026 at 10:55 UTC using live data collected from 59 managed endpoints, 184 M365 user accounts, and 3 backup-monitored endpoints. All evidence is sourced directly from the OPSIS monitoring database and reflects the security posture of Don White at the time of generation.

| MSP Representative | Client Representative | Date        |
|--------------------|-----------------------|-------------|
| <div></div>        | <div></div>           | <div></div> |
|                    |                       |             |
| Signature / Title  | Signature / Title     |             |

This report is generated by OPSIS — the autonomous IT remediation platform. Data reflects point-in-time status and should be reviewed with your MSP provider.
